

Fiscal North

Investor Pitch Deck

The AI-native household finance platform for Europe

Seed Round · July 2026

The Problem

Money is fragmented. Households are invisible to finance apps.

- Average DACH consumer: **4–8 accounts** across banks, depot, PayPal, crypto
- **23%** of couples have **zero joint accounts** — yet no app supports "yours, mine, ours"
- Subscriptions, contracts, and budgets live in **spreadsheets and separate apps**
- Existing tools: solo-only (Finanzguru) or US-only (Monarch, Honeydue)

Financial stress is the #2 cause of relationship conflict. The tools weren't built for how people actually live.

The Solution

Fiscal North — one portfolio, optional sharing, AI guidance

For individuals	For households (roadmap)
All accounts in one dashboard	Partner invites & shared view
AI assistant that acts (creates budgets, goals, categories)	Granular privacy per account
PSD2 bank sync across EU banks	Shared budgets, goals, splits
Contract & subscription tracking	AI "money date" summaries

Product Demo — What's Live Today

- ✓ **Portfolio:** Checking, savings, depot, crypto, pension, PayPal, cash
- ✓ **Planning:** Budgets, financial goals, recurring contracts
- ✓ **Insights:** Dashboard KPIs, category trends, proactive conclusions
- ✓ **Bank sync:** PSD2 via Berlin Group XS2A (finAPI) — Premium
- ✓ **AI assistant:** Gemini-powered chat with confirmable actions — Premium
- ✓ **Freemium:** Free manual tracking → Stripe Premium (14-day trial)
- ✓ **Multilingual:** DE, EN, ES, FR · Self-hostable Docker stack

Why Now

Signal	Implication
EU PFM market \$3.1B → \$10.7B by 2033	Large, growing TAM
AI-in-finance \$1.1B → \$2.95B by 2030	Our core differentiator
Honeydue stagnant; Zeta acquired	Couples category wide open
PSD2 mature; finAPI/Tink commoditize aggregation	Lower build cost
Starling, Google launching agentic finance AI	Window to own standalone PFM AI
Cost-of-living crisis	Budgeting urgency ↑

Market Size

TAM	— European PFM apps	~\$3.1B (2025)
SAM	— DACH + EN/ES/FR multilingual PFM	~\$800M
SOM	— DACH couples + AI-curious solo	~\$120M (Y5 target slice)

Beachhead: Germany — 83M population, highest fintech adoption in EU, PSD2-native

Expansion: AT, CH, FR, ES, NL (languages & PSD2 already supported)

Target Customer

Primary: DACH couples & cohabiting partners (25–45)

- Dual income, 4–8 accounts combined
- Hybrid finances — some shared, some private
- Frustrated with Finanzguru (solo) or Honeydue (US, broken sync)
- **WTP: €6–8/mo** for reliable sync + AI + partner sharing

Secondary: Solo professionals (25–35)

- AI-curious, subscription-heavy, goal-oriented
- Free tier → Premium via AI "wow moment"

Business Model

Tier	Price	What's Included
Free	€0	Manual tracking, CSV, dashboard, budgets, goals
Premium	€4.99/mo · €49/yr	AI assistant, PSD2 sync, AI notifications, goal planner
Household	€7.99/mo · €79/yr	Premium + 2 seats, shared dashboard, privacy controls
Household Plus	€11.99/mo · €119/yr	+ splits, AI household insights, 4 seats

Revenue streams: Subscriptions (primary) · Future: B2B2C (employer wellness, financial coaches) · Future: affiliate (insurance comparison, like Finanzguru)

Traction & Milestones

Milestone	Status
Full-stack MVP (backend + frontend)	✓ Shipped
PSD2 bank sync integration	✓ Integrated
AI assistant with actionable proposals	✓ Live
Stripe freemium billing	✓ Live
Multilingual (4 languages)	✓ Live
Self-hostable deployment	✓ Live
CI/CD + Docker production deploy	✓ Live
Shared household portfolio	➡ SOON Q4 2026
Mobile app (PWA → native)	➡ SOON Q3-Q2 2027

Competitive Landscape

	Finanzguru	Outbank	Honeydue	Fiscal North
Price	Free/€3	€4/mo	Free	Freemium
DACH PSD2	✓	✓	✗	✓
AI assistant	✗	✗	✗	✓
Shared household	✗	✗	✓ (US)	➡ SOON
Self-host	✗	Local device	✗	✓
Depot/crypto	Partial	✓	Balance only	Account types ✓

We win on: AI depth + household sharing + EU-native + optional self-host

Go-to-Market

Phase 1 (0–6 mo): Solo conversion

- SEO content, Reddit/Finanzen community, influencer partnerships
- Mobile PWA launch
- Target: 5K free users, 250 paid

Phase 2 (6–12 mo): Household launch

- Partner invite flow, shared dashboard
- PR: "Honeydue for Europe, but it actually works"
- Target: 15% of paid users on Household tier

Phase 3 (12–18 mo): Scale & expand

- Native apps, AT/CH/FR, B2B2C pilots

Financial Projections

	Y1	Y2	Y3	Y4	Y5
Free users	5K	25K	80K	200K	450K
Paying users	250	2K	8K	22K	55K
ARR	€16K	€144K	€624K	€1.85M	€4.95M
Conversion	5%	8%	10%	11%	12%

Key assumptions: €6.50 blended ARPU by Y3 · 4% monthly churn · 35% Household attach

The Team

Hinni Siemsen — Founder & Developer

- Full-stack builder: Spring Boot, Angular, PSD2, AI integration
- Built Fiscal North end-to-end: backend, frontend, infra, CI/CD
- [LinkedIn / GitHub — insert links]

Hiring plan (post-seed):

- Mobile engineer (iOS/Android)
- Growth marketer (DACH fintech)
- Part-time compliance/legal (PSD2/AISP)

The Ask

Raising €500K–750K Seed

Use of Funds	Allocation
Engineering (mobile + household features)	45%
Go-to-market & growth	30%
Infrastructure & PSD2/API costs	10%
Legal, compliance, ops	10%
Buffer	5%

18-month milestones with this raise:

Confidential • 8,000 paying users • €624K ARR run-rate

Vision

Today

Personal finance app with AI assistant for Europe

2027

The household finance OS — where couples and families see, plan, and optimize money together

2030

Embedded AI financial copilot powering **10M+ European households**, with optional white-label for banks and employers

Why Fiscal North Wins

1. **Right wedge** — shared household + AI in underserved DACH market
2. **Product built** — not a slide deck; working full-stack app with PSD2 + AI + billing
3. **Timing** — couples app consolidation + agentic AI wave + PSD2 maturity
4. **Defensibility** — household data graph, AI context, switching costs grow over time
5. **Capital efficient** — solo founder MVP; seed goes to GTM + mobile, not R&D from zero

Thank You

Let's build the finance app Europe's households deserve.
