5. Competitive Landscape
6. Shared Portfolio Opportunity
7. Trends & Drivers
8. Regulatory Environment
9. SWOT Analysis
10. Go-to-Market Strategy
11. Financial Outlook & KPIs

Executive Summary

Fiscal North is a full-stack personal finance platform combining portfolio aggregation, budgeting, contracts, goals, PSD2 bank sync, and an AI financial assistant — with a planned **shared household portfolio** layer.

Dimension	Assessment
Market attractiveness	High — EU PFM ~\$3.1B (2025), ~13% CAGR
AI sub-segment	High growth — ~\$1.34B (2026), ~22% CAGR
Competitive intensity	High in solo aggregation; low in DACH shared + AI
Strategic wedge	Household finance portfolio + AI copilot for Europe

The Problem

Consumers manage money across **fragmented tools**:

- 3–5 bank accounts, depot, crypto, PayPal, insurance
- Subscriptions buried in statements
- Budgets in spreadsheets; goals in notes
- Couples share logins or maintain parallel trackers

Result: No single, trustworthy view of personal or household financial health — and rising cost-of-living makes this costly.

Only ~18% of multi-adult households use collaborative budgeting tools today.

The Solution — Fiscal North Today

Capability	Status
Multi-account portfolio (checking, savings, depot, crypto, pension...)	 Live
Transactions, budgets, contracts, goals	 Live
PSD2 bank sync (Berlin Group XS2A / finAPI)	 Premium
AI assistant with actionable proposals	 Premium
CSV import, insights dashboard, notifications	 Live
Multilingual (DE, EN, ES, FR)	 Live
Self-hostable Docker deployment	 Live

Market Definition

Primary market: Personal finance management (PFM) software — mobile & web apps for budgeting, aggregation, and financial planning.

Adjacent markets included in this analysis:

- Expense tracking & subscription management
- AI-assisted financial wellness
- Shared / couples / household budgeting
- Open-banking aggregation (PSD2 AISP)

Geographic focus: DACH first → broader EU

Global Market Size

Segment	2025–2026 Baseline	Forecast	CAGR
Personal finance apps (broad)	~\$25.8B (2026)	~\$167B (2035)	~20.6%
PFM / budgeting tools (narrow)	~\$8.7B (2026)	~\$23B (2035)	~11.4%
Expense tracker apps	~\$10B (2025)	~\$28.7B (2036)	~10.1%
AI in personal finance	~\$1.1B (2025)	~\$2.95B (2030)	~22%

Europe & DACH — Our Beachhead

Metric	Value
Europe PFM market (2025)	~\$3.1 billion
Europe forecast (2033)	~\$10.7 billion
Europe CAGR	~12.9%
Germany	Largest EU market; PSD2-native aggregation is table stakes

EU-specific drivers:

- PSD2 open banking enables multi-bank aggregation
- Cost-of-living pressure increases budgeting demand

Market Segmentation

Segment	Size	Willingness to Pay	Fiscal North Fit
Solo budgeters (DACH)	Very large	€3–5/mo	★★★★★ Strong today
Couples / households	Large, underserved	€5–10/mo	★★★★☆☆ → ★★★★★★ with sharing
AI-curious 25–40	Growing	€4–8/mo	★★★★★
Privacy-first users	Niche, vocal	€5–8/mo	★★★★★☆☆ (self-host)
Investors (depot/crypto)	Medium	€5–10/mo	★★★★☆☆ (partial)
Multilingual EU			

Target Customer Profile

Primary Persona — "Anna & Lukas" (Household)

- Ages 28–38, dual income, renting or first-time buyers
- 4–8 financial accounts combined; some separate, some joint
- Want visibility without surveillance
- Already use Finanzguru or spreadsheets — frustrated by lack of shared planning
- Will pay €6–8/mo for reliable sync + AI + partner invite

Secondary Persona — "Solo Professional"

- Single, 25–35, tech-comfortable
- Wants AI to optimize budgets, catch subscriptions, plan savings goals

Competitive Landscape — DACH Solo PFM

Competitor	Price	Users / Scale	Strength	Weakness
Finanzguru	Free / ~€2.99 mo	~1.5M MAU (DE)	Brand, 3,000+ banks, contracts	Cloud-only, weak AI, no sharing
Outbank	~€3.99 mo	~56K MAU (DE)	Local privacy, 4,500+ banks, depot	No free tier, weak Android, no AI
Finanzfluss Copilot	Freemium	~62K MAU	Content + tools	Not full PFM
M... M...	~€30 one-	Mac	FinTS direct, no	Mac-only, no

Competitive Landscape — Shared / Couples Finance

Competitor	Price	Built for Couples?	EU PSD2?	AI?
Honeydue	Free	 Yes	 US banks	
Monarch Money	~\$99/yr	 Household	 US-focused	Limited
YNAB	~\$109/yr	Partial (6 seats)	 Weak EU	
Goodbudget	Freemium	Partial	 Manual	
		Was couples-		 Acquired by

Competitive Positioning Map

Position to win: Upper-right quadrant — household-ready, AI-native, EU-native.

Shared Portfolio — Why It Matters

Macro signals

- **23%** of married couples hold **no joint accounts** (up from 15% in 1996) — hybrid "yours/mine/ours" is the norm
- **~18%** of multi-adult households use collaborative budgeting tools — **82% untapped**
- Honeydue in **maintenance mode** since ~2022; Zeta **exit via acquisition**

Jobs-to-be-done

Job	Today	With shared portfolio
"Can we afford vacation?"	Spreadsheet	Unified household cash-flow

Shared Portfolio — MVP Feature Set

Feature	Priority	Rationale
Household entity + partner invites	P0	Foundation
Unified household dashboard	P0	Core value prop
Per-account visibility (full / balance / hidden)	P0	Adoption enabler
Shared budgets & goals	P0	Planning layer
Split expenses & settlements	P1	vs. Splitwise
Transaction comments / chat	P1	Honeydue proved demand
AI household insights	P1	Differentiator

Market Trends — Tailwinds

1. **PSD2 / open banking** — standardized EU account access
2. **Cost-of-living pressure** — budgeting & contract tracking surge
3. **AI adoption** — ~60–67% of Gen Z/Millennials open to AI for money
4. **Agentic finance** — assistants that propose & execute actions (Fiscal North already does this)
5. **Couples app consolidation** — Honeydue stagnation, Zeta exit
6. **Freemium dominance** — ~62% of expense-tracker revenue from freemium models

Market Trends — Headwinds

1. **Incumbent network effects** — Finanzguru's 1.5M+ users & bank coverage
2. **Platform bundling** — Gemini ambient finance on Android; Starling agentic AI in banking
3. **Trust & regulation** — GDPR, AISP licensing, AI transparency (EU AI Act)
4. **Mobile-first expectation** — Fiscal North is web SPA today; native apps expected
5. **Free-tier anchoring** — Finanzguru free sets low WTP for basic aggregation
6. **Data privacy skepticism** — cloud AI requires clear consent & opt-out

Regulatory Environment

Regulation	Impact
PSD2 / PSD3	Required for bank sync; AISP via finAPI partnership
GDPR	Consent, export, delete; self-host as trust option
EU AI Act	Transparency for AI recommendations; human confirmation for actions 
BaFin / national regulators	Compliance via licensed aggregator
Consumer protection	AI must not present as licensed investment advice

Shared portfolio adds: explicit consent per shared account, invite audit trail, data boundaries between members.

SWOT Analysis

Strengths	Weaknesses
Full portfolio account types	No shared features yet
AI assistant with actions	Limited brand awareness
PSD2 integration	Web-only (no native mobile)
Freemium + Stripe billing	Bank coverage TBD vs. Finanzguru
Multilingual, self-hostable	No live depot sync yet

Opportunities	Threats
Shared household in DACH	Finanzguru free tier
AI household insights	Neobank embedded AI
Privacy / self-host positioning	Google ambient finance

Pricing & Monetization Benchmarks

Product	Individual	Household
Finanzguru Plus	~€2.99/mo (~€36/yr)	N/A
Outbank Pro	~€3.99/mo (~€36/yr)	N/A
YNAB	~€13.80/mo (~€109/yr)	Up to 6 users
Monarch Money	~\$99.99/yr	2 people included
Honeydue	Free	Free (ads)

Fiscal North proposed tiers

Plan	Price	Includes
Free	€0	Manual tracking, CSV, core dashboard

Go-to-Market — Phase 1 (0–6 mo)

Objective: Solidify solo product & conversion funnel

- Expand PSD2 bank coverage; stabilize sync reliability
- Ship PWA or native mobile with push notifications
- Publish privacy/security page (GDPR, data location, AI opt-out)
- Launch content SEO: "Haushaltsbudget App", "Finanzen als Paar"
- Referral program: invite friend → extended trial
- Target **€3.99–4.99/mo** Premium to match Finanzguru Plus

Channels: Product Hunt, Reddit (r/Finanzen), Finanz-Influencer, App Store (when mobile ships)

Go-to-Market — Phase 2 (6–12 mo)

Objective: Launch shared household portfolio

- Household entity, 2-seat Premium, shared dashboard, privacy controls
- Marketing: *"The first AI finance assistant for how European couples actually manage money"*
- Partner invite flow with dual onboarding
- PR angle: Honeydue gap + PSD2 + AI
- B2B2C pilots: financial coaches, employee wellness programs

Target metrics: 15% of Premium users invite a partner within 90 days

Go-to-Market — Phase 3 (12–18 mo)

Objective: AI household intelligence & expansion

- Combined cash-flow forecasting for households
- Contract deduplication across partners
- Proactive "money date" AI summaries
- Expand to AT/CH/FR/NL/ES (languages already supported)
- Optional self-hosted household mode for privacy segment
- Explore white-label for credit unions / neobank partners

Financial Outlook — 5-Year Model (Illustrative)

Year	Free Users	Paying Users	ARPU/mo	ARR
Y1	5,000	250	€5.50	~€16K
Y2	25,000	2,000	€6.00	~€144K
Y3	80,000	8,000	€6.50	~€624K
Y4	200,000	22,000	€7.00	~€1.85M
Y5	450,000	55,000	€7.50	~€4.95M

Assumptions: 5–12% free → paid conversion; 35% Household tier attach by Y3; 4% monthly churn on paid.

Conservative vs. Finanzguru scale; aggressive vs. typical early-stage SaaS.

Unit Economics (Target State)

Metric	Target
CAC (blended)	€15–25
LTV (24-mo paid)	€120–160
LTV:CAC	>5:1
Gross margin	>80% (SaaS + API costs)
Payback period	<6 months
Household cohort retention	2× solo (industry benchmark)

Cost drivers: finAPI/PSD2 per-connection fees, Gemini API usage, hosting (scales with users).

Key Performance Indicators

Category	KPI
Acquisition	CAC, organic vs. paid, partner-invite rate
Activation	% linking ≥1 bank; time to first budget/goal
Shared portfolio	% households with 2+ members; privacy config rate
Engagement	WAU/MAU, AI sessions/user, notification open rate
Revenue	Free → Premium conversion, Household attach, ARPU, churn
Retention	90-day retention solo vs. household

Risk Matrix

Risk	Likelihood	Impact	Mitigation
Finanzguru adds sharing	Medium	High	Speed to market; AI depth
PSD2 API cost overrun	Medium	Medium	Usage caps; Premium gating
Low conversion on free	High	High	Onboarding, AI wow-moment, trials
AI trust concerns	Medium	Medium	Transparency, opt-out, no auto-spend
Mobile delay	Medium	High	PWA interim; prioritize iOS
Regulatory change (PSD3)	Low	Medium	Aggregator partnership

Strategic Recommendations

1. **Prioritize shared household portfolio** — largest defensible wedge in DACH
2. **Ship mobile (PWA → native)** — table stakes for couples use case
3. **Double down on AI actions** — move from chatbot to agentic assistant
4. **Price Household at €7.99/mo** — below 2× solo, above Finanzguru Plus
5. **Build trust narrative** — GDPR, self-host option, AI opt-out, German servers
6. **Partner with finAPI/Tink** — breadth of bank coverage vs. build
7. **Measure household retention** — primary north-star for product-market fit

18-Month Product Roadmap

Q3 2026	Mobile PWA · Bank coverage expansion · Privacy page
Q4 2026	Household MVP (invites, shared dashboard, privacy)
Q1 2027	Shared budgets/goals · Split expenses · AI household insights
Q2 2027	Native iOS/Android · AT/CH launch · B2B2C pilots
Q3 2027	Depot live sync · Household Plus tier · Referral program v2
Q4 2027	Agentic workflows · White-label exploration

Summary

Question	Answer
Is the market large enough?	Yes — \$3.1B EU PFM, growing ~13%/yr
Is there a gap?	Yes — no DACH-native shared + AI + PSD2 product
Can Fiscal North win?	Yes , with household sharing + AI depth + EU trust
What to build first?	Mobile + household MVP + conversion funnel
What to avoid?	Competing on free solo aggregation alone

Thank You

Fiscal North
